More Illegal Dumping of Frack Fluids Caught! (photos)

Permalink: <http://tinyurl.com/ElmiraFrackDump>

Editor's note:

*This was just sent to me by a friend from the Elmira NY area --
BH*

() It has been pointed out that "storm sewers" do not go to
sewage treatment facilities. These rainwater drains go straight to
the creek or the river, unfiltered.*

*Also, sewage treatment facilities are not designed to remove
heavy metals, solvents, salts, or other industrial chemical wastes
found in these fluids.*

Hmm. The materialist definition of "DELUSION" is...

BEAUTIFUL PICTURE OF THE DAY

Just thought you might be interested in something odd we saw today.

In the West end of the **Riverfront Holiday Inn** in **Elmira** parking lot a trucks labeled **Badger Residual Waste** was parked above a storm sewer drain in the lot and had a valve in the .5 open position and there was a huge ice formation on the drain and on the pavement where the truck tank contents appeared to have drained.

The ice formation was on the tires so you could clearly see that the ice had formed on the tires, drain, and pavement from the trucks tank being drained in the parking lot in the position the photograph was taken.

It seems that the truck is being drained as shocking as it might seem in the storm sewer drain(*).

You can see it for yourself right now in the Holiday Inn parking lot at the West end just on the side of Water St. in Elmira.
